Contents of Volume 1

No. 1

Celebration . . . . . *v*

Editorial . . . . . *vi*

Original Papers

Alteration of some toxic aflatoxin responses in Syrian hamsters fed zinc carbonate-supplemented diets (SIM 00006) 1–8
by G.C. Llewellyn, G.D. Hoke, C.E. O'Rear, J.E. Mayfield and W.V. Dashek (U.S.A.)

Construction of a new vector for the expression of foreign genes in *Zymomonas mobilis* (SIM 00003) 9–15
by M.O.-K. Byun, J.B. Kaper and L.O. Ingram (U.S.A.)

Enzymic nucleotidylylation of lincosaminide antibiotics (SIM 00004) 17–21
by V.P. Marshall, T.E. Patt and A.D. Argoudelis (U.S.A.)

Degradation of highly chlorinated PCBs by *Pseudomonas* strain LB400 (SIM 00013) . . . 23–29
by L.H. Bopp (U.S.A.)

Biodegradation of xanthan by salt-tolerant aerobic microorganisms (SIM 00015) 31–37
by C.T. Chou, N. Barnabe and K. Greaney (U.S.A.)

Physiological and genetic factors for process development of cyclosporine fermentations (SIM 00007) 39–48
by S.N. Agathos, J.W. Marshall, C. Moraiti, R. Parekh and C. Madhosingh (Canada)

Efficacy of methylchloro/methylisothiazolone biocide against *Legionella pneumophila* in cooling tower water (SIM 00012) 49–56
by W.F. McCoy, J.W. Wireman and E.S. Lashen (U.S.A.)

Phenylacetic acid in an anaerobic swine manure digester (SIM 00009) 57–61
by E.L. Iannotti, R.E. Mueller, D.M. Sievers, D.G. Georgacakis and K.O. Gerhardt (U.S.A.)

Short Communication

Effect of carbohydrate source on alpha-amylase and glucoamylase formation by *Clostridium acetobutylicum* SA-1 (SIM 00008) 63–67
by A. Chojecki and H.P. Blaschek (U.S.A.)

No. 2

Original Papers

Synthesis of unique proteins at the onset of carbon starvation in *Escherichia coli* (SIM 00002) 69–73
by R.G. Groat and A. Matin (U.S.A.)

Absence or presence of glucose in growth medium and its effect on heat injury in *Staphylococcus aureus* (SIM 00005) 75–78
by J.L. Smith, M.M. Bencivengo and S.M. Kalinowski (U.S.A.)

Cloning of an endoglucanase gene from *Pseudomonas fluorescens* var. *cellulosa* into *Escherichia coli* and *Pseudomonas fluorescens* (SIM 00001) 79–86
by A. Lejeune, C. Colson and D.E. Eveleigh (U.S.A. and Belgium)

The effect of fifteen biocides on formaldehyde-resistant strains of *Pseudomonas aeruginosa* (SIM 00010) 87–96
by M. Sondossi, H.W. Rossmoore and J.W. Wireman (U.S.A.)
Induction and selection of formaldehyde-based resistance in *Pseudomonas aeruginosa* (SIM 00011) 97–103
by M. Sondossi, H.W. Rossmoore and J.W. Wireman (U.S.A.)
The mechanism of action of hexahydro-1,3,5-triethyl-*s*-triazine (SIM 00016) 105–112
by C.P. Barnes and R.G. Eagon (U.S.A.)
The mechanism of microbial resistance to hexahydro-1,3,5-triethyl-*s*-triazine (SIM 00017) . 113–118
by R.G. Eagon and C.P. Barnes (U.S.A.)
Oxidation of propene and 1-butene by *Methylococcus capsulatus* and *Methylosinus trichosporium* (SIM 00018) 119–127
by V. Subramanian (U.S.A.)
The use of genetic probes to detect microorganisms in biomining operations (SIM 00014) . 129–135
by J.R. Yates, J.H. Lobos and D.S. Holmes (U.S.A.)

Erratum 137

No. 3

Original Papers
Purification and characterization of three proteins from a halophilic sulfate-reducing bacterium, *Desulfovibrio salexigens* (SIM 00019) 139–147
by M. Czechowski, G. Fauque, N. Galliano, B. Dimon, I. Moura, J.J.G. Moura, A.V. Xavier, B.A.S. Barato, A.R. Lino and J. LeGall (France, Portugal and U.S.A.)
Optimization of fermentation conditions for thermostable cellulase production by *Thielavia terrestris* (SIM 00022) 149–156
by A. Margaritis and R.F. Merchant (Canada)
Distribution and analysis of plasmids in *Streptococcus thermophilus* (SIM 00020) 157–163
by G.A. Somkuti and D.H. Steinberg (U.S.A.)
Heterogeneity in the cellular protein profiles of *Clostridium botulinum* types A and B (SIM 00021) 165–170
by S. Bhaduri, P.H. Demchick and C.N. Huhtanen (U.S.A.)
Properties of alkaliphilic halophiles (SIM 00024) 171–179
by J.E. Zajic and M.J. Spence (U.S.A.)
The selective isolation of *Micromonospora* from soil by cesium chloride density gradient ultracentrifugation (SIM 00025) 181–186
by J.P. Karwowski (U.S.A.)
Biosynthesis of superoxide dismutase and catalase in *Saccharomyces cerevisiae:* effects of oxygen and cytochrome *c* deficiency (SIM 00026) 187–193
by F-J. Lee and H.M. Hassan (U.S.A.)
Selectivity and depth of microbial plugging in Berea sandstone cores (SIM 00027) . . . 195–203
by R.A. Raiders, M.J. McInerney, D.E. Revus, H.M. Torbati, R.M. Knapp and G.E. Jenneman (U.S.A.)

Short Communication
Evaluation of recalcitrance of mascara in a cartridge container system to microbial challenge (SIM 00023) 205–207
by J.A. Plotkin and D.G. Ahearn (U.S.A.)

No. 4

Original Papers

A rapid method for differentiation of dairy lactic acid bacteria by enzyme systems (SIM 00028) 209–217
by B.H. Lee, S. Haché and R.E. Simard (Canada)

Nutrient limitation as a basis for the apparent toxicity of low levels of ethanol during fermentation (SIM 00029) 219–225
by K.M. Dombek and L.O. Ingram (U.S.A.)

Effect of microbial growth on pore entrance size distribution in sandstone cores (SIM 00030) 227–234
by H.M. Torbati, R.A. Raiders, E.C. Donaldson, M.J. McInerney, G.E. Jenneman and R.M. Knapp (U.S.A.)

Selective alginate degradation by marine bacteria associated with the algal genus *Sargassum* (SIM 00031) 235–244
by J.F. Preston III, T. Romeo and J.C. Bromley (U.S.A.)

Isolation and description of antimicrobic-resistant (marker) strains of select insecticidal and noninsecticidal varieties of *Bacillus sphaericus* (SIM 00033) 245–250
by M.A. Yurks and S. Singer (U.S.A.)

The marine microalga *Chlorella stigmatophora* as a potential source of single cell protein: enhancement of the protein content in response to nutrient enrichment (SIM 00034) . . . 251–257
by J. Fabregas, C. Herrero, J. Abalde and B. Cabezas (Spain)

Purification of cellobiohydrolase I from *Trichoderma reesei* using monoclonal antibodies in an immunomatrix (SIM 00037) 259–264
by F.J. Riske, D.E. Eveleigh and J.D. Macmillan (U.S.A.)

Localization and inactivation of DNase activity in *Clostridium pasteurianum* NRRL-B598 (SIM 00036) 265–270
by A. Boonsermsuwong and H.P. Blaschek (U.S.A.)

Short Communications

*Tn*1721-induced mutation in an isoprenol degrading plasmid from *Pseudomonas putida* (SIM 00032) 271–274
by P.A. Vandenbergh and R.L. Cole (U.S.A.)

Nebularine from a novel *Microbispora* sp. (SIM 00035) 275–276
by R. Cooper, A.C. Horan, I. Gunnarsson, M. Patel and I. Truumees (U.S.A.)

No. 5

Review Paper

Factors affecting the expression of foreign proteins in *Escherichia coli* (SIM 00044) . . . 277–282
by B.R. Glick and G.K. Whitney (Canada)

Original Papers

Further studies on the genetics of *Cephalosporium acremonium* using protoplast fusion methods (SIM 00038) 283–294
by G. Perez Martinez and J.F. Peberdy (U.K.)

Phosphatase production by *Aspergillus ficuum* (SIM 00039) 295–301
by Y.W. Han and D.J. Gallagher (U.S.A.)

Analytical HPLC of the aridicin glycopeptide complex and its application to fermentation development (SIM 00041) 303–310
by C.H. Pan, G. Chan, L.J. Nisbet, M.J. Polansky, S. Vogt-Speth and R.D. Sitrin (U.S.A.)

Distribution of plasmids in groundwater bacteria (SIM 00042) 311–317
by O.A. Ogunseitan, E.T. Tedford, D. Pacia, K.M. Sirotkin and G.S. Sayler (U.S.A.)

Biodegradation of coal slurry transport wastewater organics (SIM 00043) 319–328
by J.W. Davis, M.C. Reid, G.S. Sayler and R.A. Minear (U.S.A.)
Regeneration of cells from protoplasts of *Clostridium acetobutylicum* B643 (SIM 00045) . . 329–334
by P.M. Reilly and P. Rogers (U.S.A.)

Short Communication
Escherichia coli strains with defined mutations which alter cellular permeability (SIM 00040) 335–340
by B.A. Sampson and S.A. Benson (U.S.A.)

No. 6

Original Papers
Deacetylation of *N*-acetylthienamycin to thienamycin by a cell-free extract of *Streptomyces cattleya*, the thienamycin producer (SIM 00046) 341–347
by M. Uyeda and A.L. Demain (U.S.A.)
Production of propionic acid by mixed cultures of *Propionibacterium shermanii* and *Lactobacillus casei* in autoclave-sterilized whey (SIM 00047) 349–353
by E.A. Bodie, N. Goodman and R.D. Schwartz (U.S.A.)
Bioconversion of hemicelluloses into fungal protein (SIM 00048) 355–361
by D.S. Chahal, M. Ishaque, D. Brouillard, E. Chornet, R.P. Overend, L. Jaulin and J. Bouchard (Canada)
Antimicrobial efficacy of potassium salts of four parabens (SIM 00049) 363–369
by S. Mizuba and W. Sheikh (U.S.A.)
Solubilization of coal by an extracellular product from *Streptomyces setonii* 75Vi2 (SIM 00050) 371–375
by G.W. Strandberg and S.N. Lewis (U.S.A.)
Effect of rare earth cations on bactericidal activity of anionic surfactants (SIM 00051) . . 377–381
by R.W. Berg and R.E. Zimmerer (U.S.A.)
The relationship between hydrogen metabolism, sulfate reduction and nitrogen fixation in sulfate reducers (SIM 00052) 383–388
by P.A. Lespinat, Y.M. Berlier, G.D. Fauque, R. Toci, G. Denariaz and J. LeGall (France and U.S.A.)
Isolation of thermophilic iron-oxidising bacteria from sulfidic waste rock (SIM 00053) . . 389–392
by N.A. Hendy (Australia)
Metabolism of cellobiose and cellulose by *Bacteroides cellulosolvens* (SIM 00054) 393–398
by W.D. Murray (Canada)

Author Index 399–401
Subject Index 403–404
Contents of Volume 1 405–408
